

## IURC North America Thematic Clusters

Please fill in the form below to join IURC-North America's Thematic Clusters (TC)! We created Thematic Clusters to bring together small peer groups from cities facing similar sustainable urban development challenges in a collegial environment where they can share and learn great ideas, best practices, successful pilots, new policy frameworks, and innovative solutions from one another.

So what does being in a IURC-NA TC mean exactly? It means that your city has a sincere interest in learning, sharing, and actively participating in up to six (6) capacity-building and learning events (virtual and in-person) over the course of the next two years in your chosen TC. It is not required that cities attend all TC events as some might be more relevant than others. We hope you will join us!

Please fill in the registration form and send it to
