# Alto Minho | Jamshedpur

**cim alto minho**  
comunidade intermunicipal do alto minho

The Intermunicipal Community of Alto Minho [CIM Alto Minho], set up in 2008, is an association of 10 Municipalities:

Arcos de Valdevez, Caminha, Melgaço, Monção, Paredes de Coura, Ponte da Barca, Ponte de Lima, Valença, Viana do Castelo and Vila Nova de Cerveira.

CIM Alto Minho's **main aim** is to contribute to making Alto Minho a **territory of environmental excellence** with the capacity: to develop a new combination of resources and tourist activities; to produce energy from renewables; to attract investment as well as to provide proximity services with quality and modernity, which **responds to competitiveness, cohesion and sustainability challenges**.

CIM Alto Minho's **main attributions** include planning and management of the Alto Minho's economic, social and environmental development strategy; articulation of municipal investments of inter-municipal interest; participation in the management of regional development programs and planning the actions of public entities, of a supra-municipal nature.

# ALTO MINHO 2030

## STRATEGY'S MAIN ASPECTS

# ALTO MINHO in 2030

“a **competitive** region, which creates jobs and generates wealth;

which is **attractive** to live in, to visit and to invest in;

“which is **connected**, both to Europe and to the World;

“which is **resilient**, able to adapt itself to change”

### Alto Minho has a Strategy for the 2030-time horizon...

- Which resulted from a **widely participated co-creation process**;
- **Of continuity**, both with Alto Minho 2020 Strategy as well as with previous intervention frameworks, which recognizes advances and setbacks, deepens the structural territorial priorities that remain valid and introduces new challenges;
- **Of proximity**, in the sense of being firmly bounded to the territory, to its dynamics and to its regional and cross-border context and relationships;
- **Made by and for Alto Minho**;
- **Broadband**, in the sense of being wide-ranging and able to accommodate various investment and financing possibilities under different instruments and therefore capable of sustaining multiple intervention proposals.

### Climate transition and resource sustainability

- Promotion of endogenous resources (from forestry, agri-food, economy of the sea and renewable energies sectors) through of the incorporation of added value, contributing to a more efficient economy supported by more circular and regenerative models \_ **RESOURCE EFFICIENCY | CIRCULAR ECONOMY**
- Preservation, active management and enhancement of the network of biodiversity and nature conservation areas through the implementation of strategies for landscapes of high natural and cultural value; the protection and enhancement of the coastline and the hydrographic network and its resources \_ **NATURE CONSERVATION | BIODIVERSITY**
- Climate action, through the implementation of mitigation and adaptation strategies | **CLIMATE CHANGE**
- Promotion of energy sustainability, by boosting energy efficiency and renewables \_ **ENERGY TRANSITION**
- Improvement of the levels of quality, service, integration and efficiency of water supply systems, of wastewater collection and treatment systems; and of waste management systems (focus on biowaste) \_ **WATER, (BIO)WASTE and WASTEWATER MANAGEMENT**
- Promotion of sustainable mobility in Alto Minho through the combination of infrastructures and services that aim to promote greater equity in access to opportunities, equipment and services, reinforcing the focus on public transport \_ **SUSTAINABLE MOBILITY | SOFT MODES**

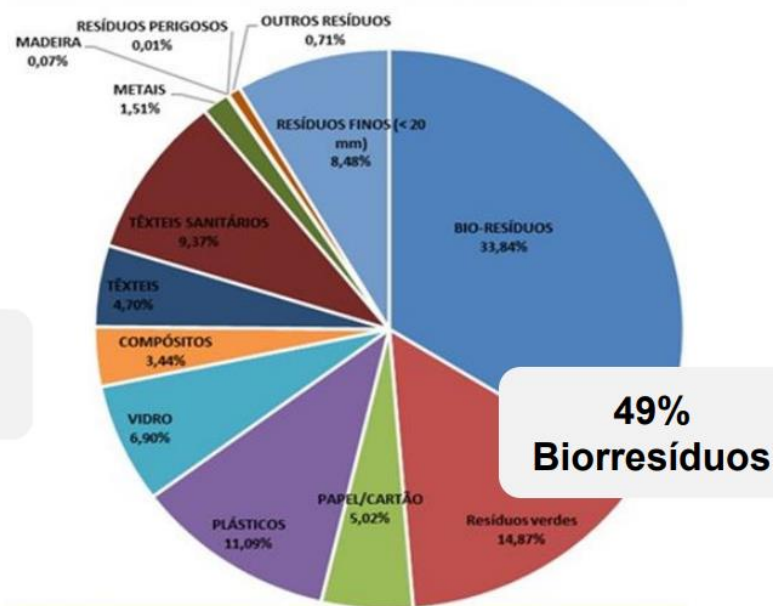

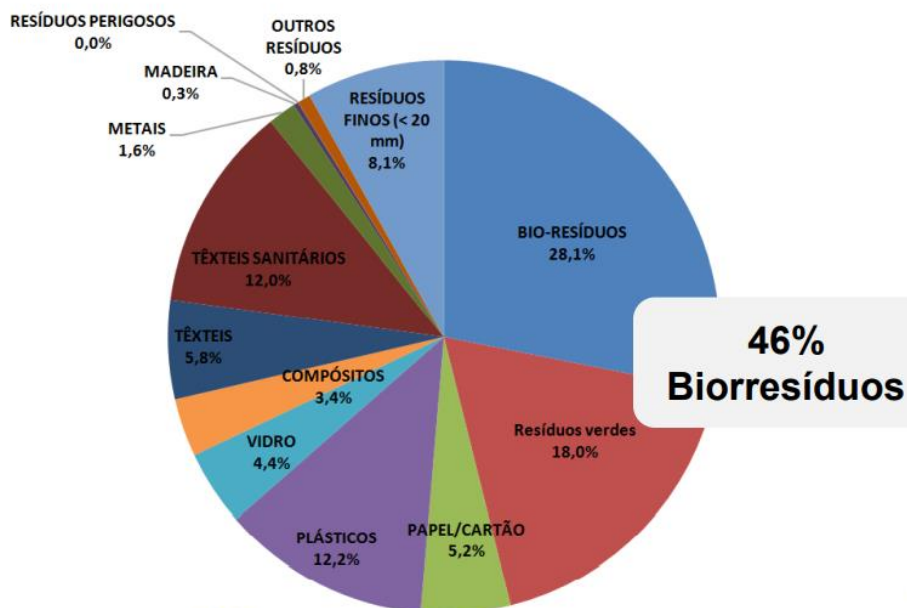

# SUSTAINABLE DEVELOPMENT GOALS

# Alto Minho | solid waste management state of the art

# Alto Minho | solid waste management shinning examples [Infrastructures and equipment]

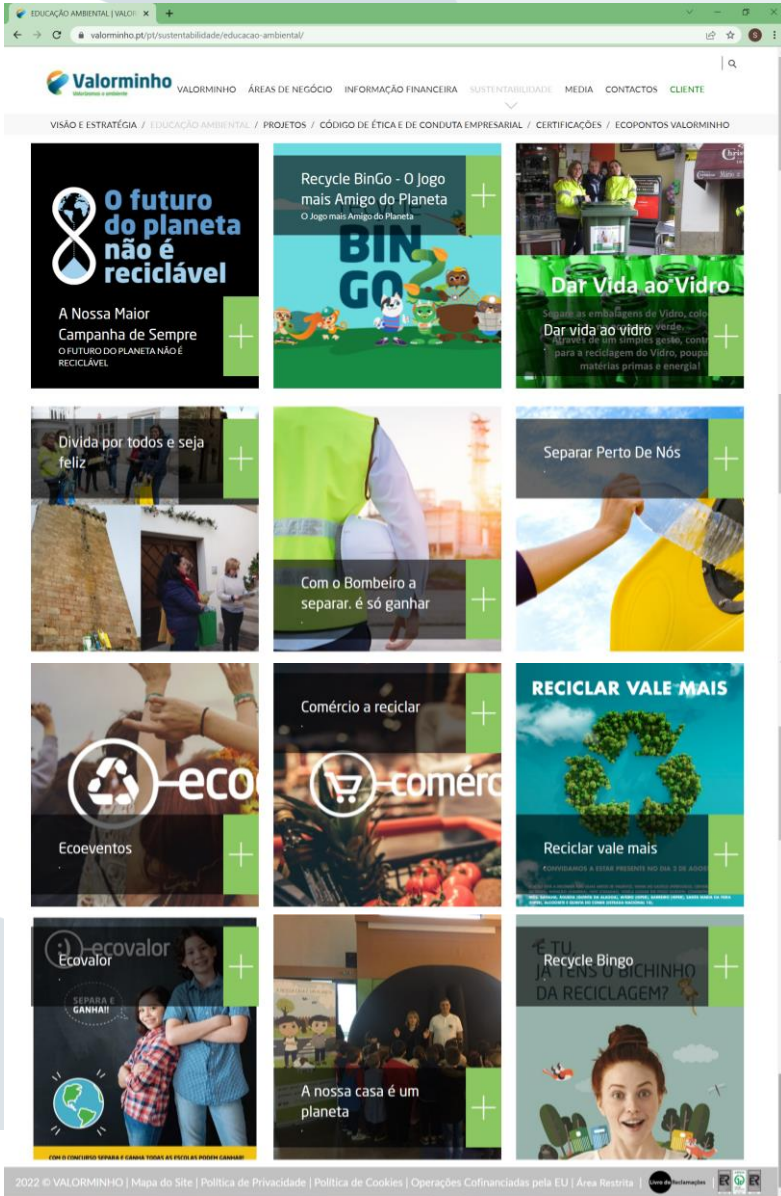

Landfill sealing [Valorminho & Resulima]

UCTP Paradela

# Alto Minho | solid waste management shining examples [awareness campaigns]

# Alto Minho | solid waste management shinning examples [awareness campaigns]

# Alto Minho | solid waste management shinning examples [awareness campaigns]

# Alto Minho | collection of used cooking oils shinning examples [Infrastructures and campaigns]

Selective collection of used cooking oil (UCO) from restaurants, bars, hotels, dwellings, etc. through the establishment of a collection scheme comprising a network of collection points

Regular communication campaigns [leaflets, outdoor billboards, lettering on vehicles, websites, social media and the collecting container itself]

Free of charge funnels and "oil pots" [to facilitate the pouring of UCO into plastic bottles]

Outdoor collection points for used cooking oil
