Abstract

The **MUFPP & IURC Asia Pacific Food Policy Training** is a series of 6 webinars developed by the MUFPP Secretariat and the IURC programme to enrich the knowledge of Asia Pacific cities on food policy development. Following the third category of the Milan Pact, *Social & Economic Equity*, the webinar will present how cities address inequality and poverty related to the food system. By undertaking different MUFPP recommended actions like the promotion of participatory education and training, encouraging social and solidarity activities, developing forms of social protection systems, cities will showcase their best efforts in ensuring their communities live in a just and safe environment.
